

Rockhill Continues to Share its Care during Pandemic

Like the rest of the world, life at the Community at Rockhill has looked a bit different since the onset of the COVID-19 Pandemic. And, like the rest of the world, we have discovered creative ways to move forward, present programming and care for our residents in all living areas.

Over the last year, we celebrated holidays, honored volunteers, snacked on fastnachts, shared a spa day with our Healthcare and Personal Care residents, hosted an online fundraiser to benefit our Benevolent Care Fund, created art, shared art, “traveled” the world, donated canned goods to area food pantries to benefit others, **met new friends and neighbors and relished our long-standing relationships**, whether in person, from the other side of the parking lot or through the reaches of the Internet. For photos and information showing life at Rockhill, we encourage you to **visit our Facebook page at www.facebook.com/rockhillcommunity**

And, again like much of the world, we came together this year for voluntary vaccine clinics. Since our first clinics in January, we have held monthly events for staff and residents.

We thank all our staff for their exceptional dedication and performance during these months of ongoing change. They continue to be our Superheroes.

Thank You to our SuperHero Staff!

Mission

We are a vibrant community providing purpose, dignity and compassion, centered in God's love.

Nursing Home Honors

For the third straight year, we are proud to be named a “**U.S. News Best Nursing Home**,” this time for 2020-21! Just under 3,000 nursing homes in the country earned this designation. Homes received their overall rating based on a rating for short-term rehabilitation care and a rating that evaluates long-term care which is for people who need ongoing daily. A strong emphasis was placed on staffing, as staffing levels are strongly associated with quality and safety.

In addition to the Nursing Home honor from US News, our **Skilled Nursing Unit was found Deficiency Free** by the PA Department of Health during their annual survey. Deficiency Free surveys are quite unusual and are a reflection of the hard work, commitment and daily care expressed by our entire team through-out every related department.
